

ABSTRACT OF THE DISCLOSURE

A steam-supplying apparatus for hairdressing and beauty care in which pressurized steam is sent from a steam-generating portion through an electromagnetic valve and a connecting tube, and forced to jet out of a steam-blowing portion. The electromagnetic valve has a heating steam circulation passage to preliminary heat inside the electromagnetic valve by the steam from the steam-generating portion also in closed state, and the steam-blowing portion has an electric heater to heat a steam passage in the blowing portion.
